The History of Eva-Dry™.

The Eva-Dry culture is a fun, forward thinking, fast paced environment that brings over 75 years of sales, manufacturing and product development experience to the table. This culture allows our team to execute swiftly and create SOP that would typically take bigger companies weeks or months to put in place. It gives us the flexibility to be about as versatile as a company can be with all aspects of our organization product development, QC, design, manufacturing, sales and distribution. We believe in the personal touch with all of our accounts and we wouldn't have it any other way!

Eva-Dry

It all begins with our brand.

Eva-Dry is not just a catchy name, it's also a statement of QUALITY, TRUST, LOYALTY, and HARD WORK. As a small business we rely on our employee's and our customer's trust and feedback to help keep us a breath of fresh air and at the top of the often stale dehumidifier world. From a startup in 2001, to the national brand it is today, we have been able to help millions of people fight back against their moisture problems with high quality, affordable solutions.

The Eva-Dry culture is a fun, forward thinking, fast paced environment and brings over 75 years of sales, manufacturing and product development experience to the table. This culture allows our team to execute swiftly and create SOP that would typically take bigger companies weeks or months to put in place, giving us the flexibility to be about as versatile as a company can be with all aspects of our organization product development, QC, design, manufacturing, sales and distribution. **PELTIER
TECHNOLOGY**

Cutting-edge tech keeps it dry.

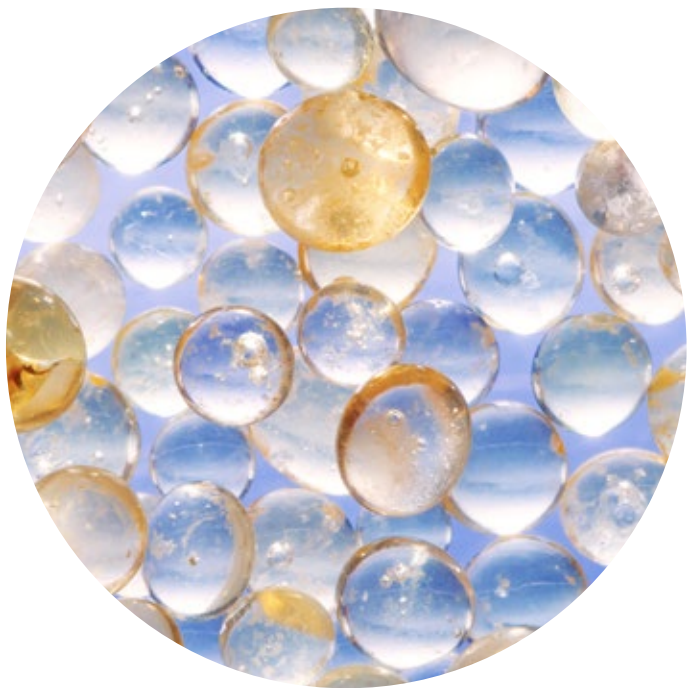

The evolution of the Eva-Dry line of dehumidifiers has grown tremendously over the past decade. We never rest when it comes to improving our products or developing new innovative solutions to our customers' dehumidification needs. Our tireless efforts have helped build the reputation our company enjoys today.

Constant innovation and successful online and retail distribution, have combined to build brand trust in the dehumidifier market.

Today, we continue to innovate, exploring new product designs and functions, connectivity to the "internet of things", and redefining what customer's can expect from a dehumidifier.

Eva-Dry has the ability to scale our production to fit ALL scenarios and needs of our customers.

Renewable Desiccant

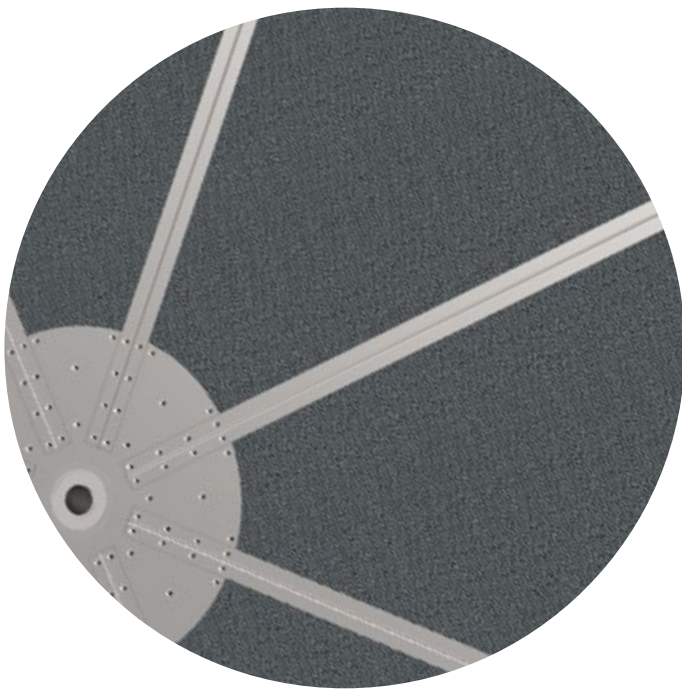

Silica xerogel are hard, translucent beads with a strong affinity for water molecules, naturally attracting these molecules from the surrounding air. They are widely used as a desiccant.

Engineered with non-toxic crystallized silica gel technology, Eva-Dry uses Silica Gel dessicant technology in a variety of our products. From disposable pouches to eco-friendly renewable units that can be recharged by plugging in to an electrical outlet.

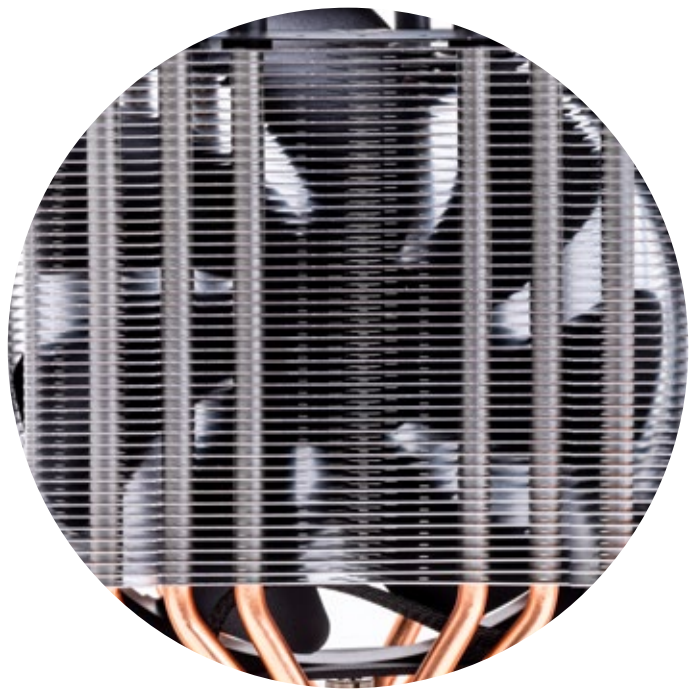

Rotary Desiccant Technology

Innovative rotary desiccant technology provides high volume dehumidification without requiring a compressor.

The Eva-Dry EDV-4000 Rotary Desiccant Dehumidifier unit is safer and quieter than compressor-based systems. It is designed for low maintenance operation, with a high capacity water catch basin that requires only periodic emptying. A built-in ionizer and bacteria-killing filter improves air quality.

Peltier Effect Technology

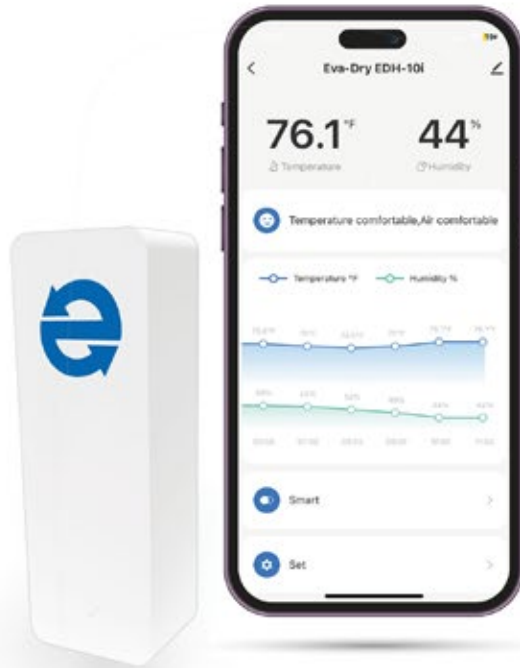

The Peltier effect is a temperature difference created by applying a voltage between two electrodes connected to a sample of semiconductor material.

Eva-Dry products that use our ultra-quiet energy efficient Peltier Technology, quickly and efficiently pulls moisture out of the air in 24 hours at 86° and 80% RH. The devices are eco-friendly and energy efficient. Quiet enough to place on your nightstand!

EDH-10i

Temperature & Humidity Sensor

Key Features

Advanced Connectivity: Connects effortlessly to any 2.4 GHz WiFi network without the need for an additional hub, allowing for real-time temperature and humidity monitoring from anywhere via the Free Eva-Dry app.

Intelligent Alerts: Set custom alerts for any changes in temperature or humidity.

Adhesive Foam Mounting Strip: Comes with a double-sided adhesive mounting strip giving you the flexibility to install it anywhere from your nursery to your wine cellar.

Low Energy Consumption: Operates efficiently on 2 AAA batteries (not included), ensuring long-lasting performance with minimal maintenance.
Compact and Sleek Design: With its small dimensions (2.79" x 0.98" x 0.79" inches), this sensor maintains a low profile while providing high functionality.

Benefits

Discover the ultimate solution in climate management across diverse environments with the Eva-Dry EDH-10i, a state-of-the-art smart temperature and humidity sensor that brings precision and convenience directly to your fingertips. Designed to be your go-to device for maintaining perfect conditions, the EDH-10i pairs seamlessly with your WiFi network, enabling you to monitor and adjust the atmosphere in your home, RV, boat, storage area, reptile cage, indoor garden, or even your meat curing chamber from anywhere at any time. Whether you're safeguarding your living spaces or specialty areas, the EDH-10i ensures optimal conditions with ease and efficiency.

Specifications

Style Code: EDH-10i

Name of Product: Temperature & Humidity Sensor

Size: 2.79"H x 0.98"L x 0.79"W

Color: White Sand

Warranty: 1 Year Limited Warranty

App Compatibility: Eva-Dry App

Wireless Connectivity: WiFi 802.11b/g/n 2.4GHz (Note: 5G not supported)

Battery Type: 2 x AAA batteries (not incl.)

Packaging: Individual Gift Box

Individual Weight: 1 oz.

Inner CTN: 4 Inner Cartons of 12

Master CTN: 48pcs.

Master CTN Weight: 5.53 lbs.

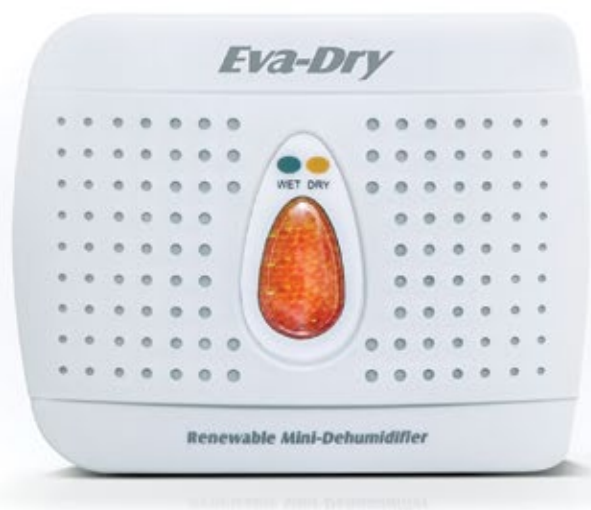

Master CTN Size: 12.6 in X 14.5 in X 4.33 in

UPC: 832856000863

E-333

Mini Renewable Dehumidifier

Key Dehumidifier Points

- Absorbs 4-6 oz of moisture
- Works in a 333 cubic ft. area
- Space saving
- 100% renewable
- Lasts up to 10 years
- No batteries or cords required
- Spill and mess free
- Approx 10-12 hrs to renew
- Child and pet safe

The mini dehumidifier has been designed to absorb moisture from small enclosed areas. It will help protect clothes and valuables from the damaging effects of mold/mildew and moisture rot. It is 100% renewable and needs no power to operate. Place the Eva-Dry unit in a closet or any small, enclosed space, and it will start to absorb moisture immediately.

Effective Innovation to Eliminate Dampness

There is an indicator window with special "Color Changing Crystals" that change from orange (when dry) to green (when wet) to indicate when the unit needs to be "renewed". The unit will absorb approx. 4-6 ounces of moisture (depending on humidity levels this should take approx. 3-5 weeks). Once the moisture has been absorbed it cannot leak or spill. This unit uses a specially engineered, crystallized silica gel that is odorless, non-toxic, and completely safe.

Instructions

To "renew" the unit simply plug it into a power outlet in a well-ventilated area (patio, garage, outside area, etc.). Our worldwide-patented technology will warm the crystals, allowing them to expand and release the moisture as water vapor into the outside air. It takes about 10-12 hours to completely "renew" the unit. Once renewed, the crystals will change back to orange indicating the unit is ready to absorb another 4-6 ounces of moisture. Used correctly, the crystals will remain active for 10 years.

Eva-Dry offers a 5-year limited manufacture's warranty on all E-333 units.

Specifications:

Style Code: E-333

Product Name: Mini Renewable
Dehumidifier

Size: 6.25" L X 1.25" W X 4.75" H

Color: White Sand

Packaging: Natralock

Inner CTN: 4 Inners of 6 Pieces

Individual Weight: 1 lb. 2 oz.

Master CTN: 24pcs.

Master CTN Weight: 35 lbs.

Master CTN Size: 21" L x 13" x 21" H

UPC: 832856000060

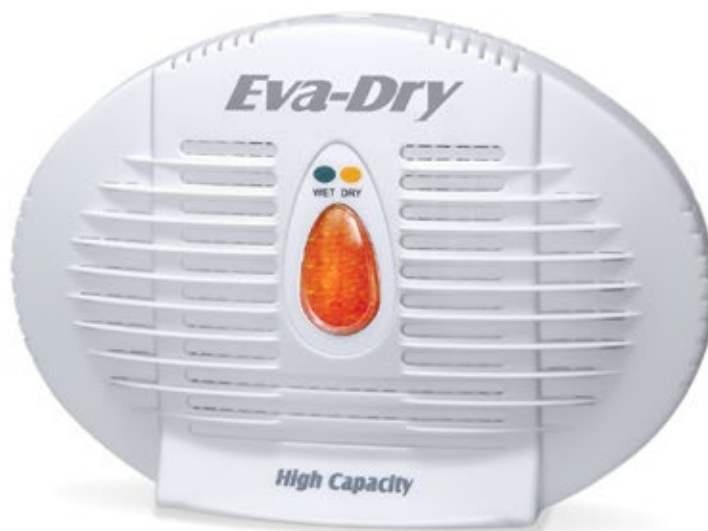

Minimum Order: 1 case pack

Warranty: 5 Year Limited Warranty

E-500

High Capacity Dehumidifier

Key Dehumidifier Points

- Absorbs 6-8 oz of moisture
- Helps remove excess moisture that can lead to mold & mildew
- Works in a 500 cubic ft. area
- High capacity
- Lasts up to 10 years
- Spill and mess free
- Approx 10-16 hrs to renew
- Child and pet safe

The E-500 has been designed to absorb moisture from small enclosed areas. It will help protect clothes and valuables from the damaging effects of mold/ mildew and moisture rot. It is 100% renewable and needs no power to operate. Simply place the Eva-Dry unit in any small, enclosed space, and it will start to absorb moisture immediately.

Effective Innovation to Eliminate Dampness

There is an indicator window with special "Color Changing Crystals" that change from orange (when dry) to green (when wet) to indicate when the unit needs to be "renewed". The unit will absorb approx. 6-8 ounces of moisture (depending on humidity levels this should take approx. 4-8 weeks). Once the moisture has been absorbed it cannot leak or spill. This unit uses a specially engineered, crystallized silica gel that is odorless, non-toxic, Eco-Friendly and completely safe.

Instructions

To "renew" the unit, simply plug it into a power strip (the E-500 is too heavy for a wall outlet) in a well-ventilated area (patio, garage, outside area, etc.). Our worldwide-patented technology will warm the crystals, allowing them to expand and release the moisture as water vapor into the outside air. It takes about 12-16 hours to completely "renew" the unit. Once renewed, the crystals will change back to orange indicating the unit is ready to absorb moisture. Used correctly, the crystals will remain active for 10 years.

Eva-Dry offers a 5-year limited manufacture's warranty on all E-500 units.

EDV-365

Air-Dry System

Key Benefits

- Absorbs 5-7 oz of moisture per cylinder
- Quick renewable time
- 100% renewable
- Helps remove excess moisture that can lead to mold & mildew
- Child & pet safe
- Modular scalable system
- Spill and mess free

Effective in the elimination of excess moisture

The breakthrough Eva-Dry Air-Dry system is a revolution in dehumidifying, reducing the renewal time by 80% compared to its predecessors the E-333 & E-500. The EDV-365 renewal process uses a blow-drying base for the cylinders to renew on, drying the silica gel beads quickly and efficiently in only 2-3 hours. The Air-Dry system is built to the highest industry standards, and will be a great addition to your dehumidifying arsenal. Each cylinder covers 400 cubic ft. of space, and is a modular/ buildable system, with no risk of spills, and requires no messy refills. As with all of the Eva-Dry renewable silica gel products, the Air-Dry cylinders can go anywhere, and are child, pet, and home safe.

Instructions

When the "Color Changing Crystals" turn green it is time to "renew" the cylinders, take the blow-drying base into a well-ventilated area (patio, garage, outside area, etc.), plug it in, set the cylinder on the base and turn the base on. The blow-drying base will rapidly dry the silica gel beads out in only 2-3 hours (per cylinder), once all of the color changing crystals return to their original orange "dry" color the cylinder is ready to use again. You can repeat this dehumidification and renewal process for up to 10 years!

The Eva-Dry Air-Dry system comes with a 1-year warranty on the base and a 5-year warranty on the cylinders.

Air-Dry System Specifications

Style Code: EDV-365

EDV-1100

Electric Petite Dehumidifier

Key Dehumidifier Points

- Environmentally friendly
- Helps prevent mold and mildew
- Allergy and asthma relief
- Low power consumption
- Peltier technology/no compressor
- Auto shut-off with LED indicator

Dehumidifier Benefits

The EDV-1100 is an electric petite dehumidifier, using Peltier technology, it is ideal for smaller rooms up to 1100 cubic ft. such as: a home office, bathrooms, kitchens, walk in closets, RVs, boats, laundry rooms, nursery, and perfect for use in hobbies such as sausage curing and jelly making. Simply plug the unit in, turn it on, and it quietly gets to work extracting moisture from the air and storing it in its spill-proof reservoir. Using Peltier technology (no compressor) it is a very economical way to remove moisture, using only a fan and two aluminum plates (one warm, one cool) to dehumidify. The unit will draw humid air over the warm plate and heat the air up, once heated, it moves the air over the cool plate which will draw the condensation trapping it in the removable reservoir and expelling the dry air out.

The EDV-1100 is able to absorb up to 8oz of moisture in a 24-hr. period at 80° F & 86% RH, while only using 22.5W (9V DC, 2.5AMP).

The EDV-1100 has a 1-year limited warranty.

EDV-1200

Mini Electric Dehumidifier

Key Dehumidifier Points

- Helps remove excess moisture that can lead to mold & mildew
- Energy efficient
- Water Tank Capacity: 30 oz.
- Peltier technology/no compressor
- Auto cut-off with LED indicator

Dehumidifier Benefits

The EDV-1200 is a mini-capacity, electric dehumidifier that is designed to remove moisture from areas that are up to 1,200 cubic feet, making it perfect for Closets, Tiny Houses, RVs, home offices, and boat cabins. It uses Peltier Technology, which means it's quiet enough for your baby's nurse or nightstand. Simply plug the EDV-1200 in, turn it on and it goes to work quietly absorbing excess humidity from the air. Its effectiveness is measured in gathering approximately 8 oz. of moisture in a 24 hour period at 86° F and 80% RH.

We offer a 1 year limited warranty on the EDV-1200.

Specifications

Style Code: EDV-1200

EDV-2400

Mid-Size Electric Dehumidifier

Key Dehumidifier Points

- Helps remove excess moisture that can lead to mold & mildew
- Energy efficient
- Built-in humidistat
- Water Tank Capacity: 30 oz.
- Peltier technology/no compressor
- Auto cut-off with LED indicator
- 3 ft. drain hose included

Dehumidifier Benefits

The EDV-2400 is a mid-sized, electric dehumidifier designed to pull moisture from areas that are up to 2,400 cubic feet. The EDV-2400 has a built-in humidistat, allowing you to set your desired RH level and change the fan speed on the unit to customize your environment. Using thermal electric Peltier technology, the EDV-2400 packs a powerful punch against the damaging effects of excessive moisture, and has the ability to continuously drain with a removable soft drain plug and included drain hose. With the ability to drain continuously, the EDV-2400 is a great solution for winterization of your boat, RV, and vacation home. Its effectiveness is measured in gathering approximately 25oz. of water in a 24 hour period at 86° F and 80% RH.

We offer a 1 year limited warranty on the EDV-2400.

Specifications

Style Code: EDV-2400

Warranty: 1 Year Limited Warranty

EDV-4000

Rotary Dessicant Dehumidifier

Dehumidifier Benefits

The EDV-4000 is the first home/office dehumidifier to use innovative rotary desiccant technology to provide high volume dehumidification without requiring a compressor. The unit is safer than compressor-based systems and designed for low maintenance operation, with a high capacity water catch basin that requires only periodic emptying. Also includes a built-in ionizer and a filter to improve air quality.

The Eva-Dry 4000 dehumidifier is designed for medium to larger spaces of up to 4000 cubic feet, including:

Large closets: Eva-Dry prevents damage to fabrics and odors caused by excess moisture.

Bedrooms and Baths: Absorbs odors, and prevents damage caused by excess moisture that can accumulate.

Cabins: Keeps the air dry. Ideal for cabins and vacation homes on or near the water.

Large RVs and boats: Protect your investment from excess humidity and moisture damage.

Basements: Keeps basements dry and humidity-free, alleviating condensation build up and dripping.

Offices: Protects hardwood floors from moisture damage.

Specifications
